

# STC 11

Compact Outer Case Coder

# STC 11

the compact and cost-effective solution for your secondary packaging

## Simple Solution

The STC11 is the simplest solution for the printing basic information such as:

- product name
- date / time
- julian date
- expiration date
- counter
- repeat print etc.

on porous substrates (outer cases...).

It's intuitive menus require little skill and training to operate successfully.

## Cartridge Based Concept

STC11 benefits from all the key benefits brought by the cartridge concept:

- high resolution printing
- no maintenance
- simplicity of use.

## Flexible Production Line Integration

STC11 has a self-contained robust steel case and is available in two versions: one with the printhead integrated (with the controller) and one with a remote mounted printhead. Thanks to its compact design and remote printhead option, STC11 will fit on every production line.

## STC11 at a glance...

### Clean & easy operation

- straight-forward intuitive interface
- zero maintenance
- only environmentally friendly inks
- no toxic waste, no disposal
- ink cartridge change in a few seconds

### Excellent print quality

- messages in graphic quality
- resolution up to 600 dpi

### Low running costs

- uses only ink, no solvent
- no repair or part exchange costs
